GREAT AVIATION MEET BEGINS THIS AFTERNOON.

Flights By The Aviators As Soon As Possible After One O'clock.

GROUNDS ARE READY AND ARE IDEAL.

This is the opening day of the great aviation meet, the first of the kind ever seen in this part of the country. Jimmy Ward, A. H. Lockwood and C. O. Prowse, the aviators, have examined the grounds and pronounced them ideal. The field is a natural amphitheatre, with a tall hedge fence on two sides of the triangle and the T. C. Railroad on the long side. Trains stop in the grounds, the rate being 10 cents for the round trip, every 10 minutes.

Ward and Lockwood will make ascent flights this afternoon, three crossings.

Positively no vehicles allowed on or near the grounds.

Season tickets good for three days--\$1.00.

General admission tickets for each day .50c.

Half tickets, children under 12 years of age--25c.

Main entrance via T. C. R. R. Trains will be run every 10 minutes. Round trip 10c.

STANLEY

Made Two Speeches In The County Yesterday.

Congressman A. O. Stanley spoke yesterday afternoon at Pembroke last night at the Court House to a crowd. His audience here was an enthusiastic one and Mr. Stanley was in fine fettle and delivered a strong appeal for the Democratic ticket.

Breathitt Saturday.

Hon. Jas. Breathitt, Attorney General, will speak in the interest of the Republican ticket at the Court House Saturday afternoon.

Mrs. C. R. Clark visited friends in town this week.

FIRST SERVICE TONIGHT

2000 PEOPLE HEARD BRYAN

Of Autumn Rally to be Held Tonight at Ninth St. Christian Church.

DR. RAIS WILL BE HERE.
Chief Meeting of Rally Will Be Held at 10:45 a. m. Sunday Next.

A letter received by the minister of the Ninth St. Christian church from Rev. F. M. Rains, of Cincinnati, states that Dr. Rains will be here in time for the conference of workers on Saturday night, which is to be the first service of the Autumn Rally of the Ninth St. church. Dr. Rains will come to Hopkinsville from Chicago.

Dr. Rains is no stranger to the church, having preached the opening sermon at the conclusion of the repairing and enlargement of the church building four years ago. His service of that day lingers in the memories of our people and insures him a great hearing next Sunday. Moreover by correspondence as one of the leaders of the first order in the army of disciples of Jesus he has kept in touch with the Ninth St. church which is a conspicuous supporter of national and world movements for the spread and in circulation of the Gospel. His coming is therefore that of a friend and keeper and admired and trusted leader.

Dr. Rains is said to be the funniest man in the pulpit of the people with whom he is identified. He is brimful of wit, humor and cheer. But he is more noted for the dogged and persistent purpose to get real work done for the Kingdom of his Master than for anything else in his remarkably versatile character.

The chief meeting of the Rally will be held at 10:45 Sunday morning next. While the music as well as the address of this hour will be of special interest to members of the congregation all are cordially invited to participate in it.

The W. C. T. U. will meet at the Methodist church at 3:30 this afternoon.

In Spite of The Early Hour of His Speech In Hopkinsville.

LEADER LOUDLY CHEERED
Next Governor Also Made a Brief Speech Predicting a Great Victory.

The Democratic special train carrying Wm. J. Bryan, Jas. B. McCreary, Jas. W. Newman, Tom Rhea and other state candidates arrived here at 7:30 Tuesday morning and Mr. Bryan found a crowd of 1500 to 2000 assembled in Peace Park. Hon. J. W. Newman had been speaking to the crowd for some time, from a stand near the railroad side of the Park when the special arrived. Mr. Bryan was escorted at once to the stand and made a speech of about 30 minutes.

The speech of Mr. Bryan was devoted largely to national issues, but he pleaded with the voters to go to the polls next Tuesday and elect the democratic state ticket, saying that the election in Kentucky this year was one of the most important ever held in Kentucky, as this year, he said, the people of Kentucky were to set an example for the nation and to show by their votes whether or not they endorsed the rule of the republican party in the state and nation.

He said the election this year in Kentucky would have much bearing on the national election next year and that the eyes of the millions of democrats over the country were watching Kentucky this fall. He said that the democrats of the state owed it to the people of the country to send Ollie M. James to the United States senate. He stated that the outlook is bright for a democratic victory in 1912 and urged all to unite toward the cause of electing a democratic governor this fall and to be in line for 1912.

He declared that the Democratic party "fighting on its back for a decade and a half, has licked its opponents to a standstill and brought victory to its platform of principles." He praised the progressive Republicans who had helped to make this possible.

At the conclusion of his speech, Gov. McCreary, standing on the platform of the car, made a very brief speech as the train pulled out for Pembroke.

Prof. Barksdale Hamlett, Judge Walter Knight and other local leaders joined the party here and went as far as Guthrie.

MRS. GARY DEAD

Venerable Wife of Mr. R. S. Gary Passes Away.

Mrs. Mattie L. Gary, wife of Mr. R. S. Gary, died Monday night at her home a few miles south of town. She had been in failing health for a year or more. Mrs. Gary was in the 71st year of her age. She was Miss Clark before her marriage and of a family of fourteen children only two now survive, her brother Clifton Clark of Sedalia, Mo., and her sister, Mrs. Sue Shanklin, of this city.

Mrs. Gary leaves beside her husband three sons, James, Robert and W. H. Gary and one daughter, Mrs. J. B. Walker, all of this county. Another daughter, Mrs. Jennie Bush, died a number of years ago.

She was a devoted member of the South Union Baptist church. The pastor, Rev. H. E. Gabby, conducted the funeral services Tuesday and the interment took place in the family burying ground.

Terrible Picture of Suffering.

Clinton, Ky.—Mrs. M. C. McElroy,
in a letter from Clinton, writes:
"For six years, I was a sufferer from
female troubles. I could not eat,
and could not stand on my feet,
without suffering great pain. Three
of the best doctors in the state said
I was in a critical condition, and going
down hill. I lost hope. After
using Cardui a week, I began to im-
prove. Now I feel better than in
six years." Fifty years of success
in actual practice, is positive proof
that Cardui can always be relied on,
for relieving female weakness and
disease. Why not test it for your

BIG PROBLEM OF COLLEGE

Many Parents Doubtful of Wisdom of
Sending Their Boys and
Girls There.

Shall we send our boys and girls to college? That is still an open question in the minds of many parents who are not convinced of what they have seen of graduates and undergraduates that the years spent in separations and supposedly in study pay. The answer to this question, we think, may often be found in the wish and ambition of the boy or girl. To cross the settled desire of a thoughtful boy must always be a doubtful matter. The real question is whether the unthoughtful and the unambitious should be sent. Many of these may be waked up to ambition in college, but their chances of success in life will be much greater if they enter with a strong initial purpose and desire. It might be well if fathers and mothers were this summer to question their sons and daughters who are nearing the college entrance age to ascertain whether they have given any real thought to what the college opportunity stands for to themselves in particular. If the nebula of childish thinking that goes with so many of the examinations could be reduced to definite points of light before entrance it would greatly simplify the task of the college and increase the chances of success in life for every student. There was a wise father, himself a successful educator of boys, who insisted that his sons should have at least a year's experience in business before they went to college. Their success in various walks of life has amply vindicated the wisdom of his plan.—The Congregationalist.

CHEESE AS FOOD.

Cheese contains all the essentials
of human food, according to a
pamphlet recently issued by the de-
partment of agriculture. The popular
belief that cheese, even when
green or unripened, is difficult of di-
gestion is not justified. The milk
solids in cheese are very digestible
and make an almost perfect food.
With the addition of rennet and the
development of lactic acid in cheese-
making, some chemical changes take
place; but these do not transform di-
gestible solids in milk into indiges-
tible solids in cheese. The digestive
disturbances attributed to peculiari-
ties in the cheese itself are probably
due merely to over-eating, or to the
custom of eating cheese only at the
close of the meal, when one has al-
ready had more than enough food.

TWO MILLION YEARS OLD.

An important discovery recently
made in Spain appears to place be-
yond doubt the existence of primitive
man in the Pliocene period—
say between one million and two mil-
lion years ago. Simple and roughly
fashioned tools were found asso-
ciated with rocks and fossils which
undoubtedly belong to this period.
Modern discoveries have greatly ex-
tended knowledge of man's antiquity,
and have shown that the human race
was in existence long before the
Ice period which succeeded the Pliocene
era.

Dead From a Thorn Thrust.

A thorn of her favorite rose puncturing her finger while she stretched forth her hand to pluck it for a friend's bouquet, caused the death of Miss Susan Reichart at Greenport, N.Y. Several doctors united in trying to cure the blood poisoning that resulted from the prickly wound, but their efforts were unavailing.

PERILS OF MODERN LIFE

Aviator Cites Case of Jorkins to Show Walker is in as Great Danger as Flyer.

Miss Harriet Quimby, after one of her daring aeroplane flights at Mineola, L.I., smiled lightly at a reporter's mention of the danger of flying.

"Oh, there's danger everywhere," she said. "The walker is in as much danger almost as the flier. Did you never hear about the fate of Jorkins?"

Jorkins, poor fellow, came from the country to New York. The noise and confusion of New York quite upset him. Threading his way across the busy street, he thought he would go mad.

"Clank! Clank!"

Jorkins leaped to the right just in time to escape a motor car.

"Ding-a-ling! Ding-dong."

"He darted to the left from under the very wheels of an automobile fire engine.

"Hum-m-m!"

Jorkins, looking up in the air, now saw a monoplane, its tail smashed, falling straight upon him. He glared wildly round, caught sight of a manhole, lifted the cover and jumped down into a black hole just in time to be cut in half by an underground electric train.

Suppose that instead of being provided with a frictionless, ball and socket joint, your arms had to stretch a muscle or ligament every time you moved them. You would be tired out long before bed time.

333 Main St., Shirley, Mass.**THAT CLINGING REST HABIT HAD BEEN LOOKING FOR HIM**

Hard to Break, but It Can Be Done, Says the Amiable Mr. Glimmerton.

"For that don't feel like work feeling, with which," said Mr. Glimmerton, "I fancy we are all of us more or less likely to be afflicted, I would in some cases prescribe rest, though in most cases no doubt the proper prescription would be exertion."

"The trouble with the rest cure is that it is like taking opiates; the more you take the more you want. The rest habit is easy to acquire and hard to break."

"The habit of exertion, on the contrary, is one that commonly we do not take so kindly; it does not, as it were, spontaneously permeate us as the rest habit does; it may in fact require assiduous cultivation, and it takes quite a man to acquire this habit in a completely saturating and permanent form so that he is proof against attacks of the rest habit, which, if he has a trace of it left in him, is sure to develop on the slightest provocation."

"Exertion is the only real cure. It may be hard to take at first, but you'll come to like it. Persist and you'll find it vastly strengthening and then delightful; and then, while in taking the rest cure you are all the time paying money out, in taking this one you have money all the time coming in."

"Try work, continuous, steady, hard work. Once get the habit of work embedded in your system and you won't be troubled any more by that tired feeling."

WAS THE FRIEND OF A KING

Merchant Told of the Strong Attachment of King Edward for John Bright.

An interesting account is given for the first time of an incident which began the friendship that existed between John Bright and King Edward VII. The story was told by Mr. Bright in the hearing of Mr. Connah, a merchant in Manchester. Mr. Bright, it seems, had, at a meeting in St. James' hall, rebuked those people who were criticising Queen Victoria for her rare appearances at public functions after the passing away of the prince consort. On the following morning the private secretary of King Edward (then Prince of Wales) called upon Mr. Bright with a special request from the prince to call upon him at Marlborough house. Mr. Bright at first demurred, but yielding to the pleading of the messenger, he went, and he was received in the most friendly manner by the prince and introduced to the family circle. The prince took Mr. Bright aside and as a son thanked him for his kindly words on behalf of the mourning queen, and asked to be granted the privilege of being counted among the Tribune's friends. "Whatever may be my personal opinion of kings and princes," Bright said, concluding his narration of the incident, "the man before me was soon making an appeal on behalf of his mother, and I could not resist it. We shook hands, and have been close friends ever since."—Christian Science Monitor.

New Heat Unit.

The use of gas for heating as well as lighting has made obsolete the old unit the candle power, owing to the fact that this unit rates merely the brightness of the flame, not the heating power.

Deville and more recent experimenters discovered a remarkable proportion between the light and heat of a mantle, and using this, makers are rating burners according to the units of heat given to them per unit of time in standard calorics. Gas of 5,200 calorics efficiency a cubic meter has been recommended as the standard.

The latest designs of burners for heat and lighting require that the gas have a fairly constant consumption, since the maximum efficiency of the burner is attained only when the relative quantities of air and gas are closely regulated. Water gas may be added to prevent excessive variation in calorific value.—America.

An Incident of the Road.

"Stop!" cried the man in the road. "You are exceeding the speed limit."

"That's all nonsense," retorted Binks, bringing his car to a standstill.

"That's what they all say," said the man in the road, climbing into the car. "You can tell your story to the magistrate at Hinktown—just seven miles up the road. Start along, please."

They drove on in silence to Hinktown, where, as the car drew up in front of the courthouse, the man in the road got out.

"Much obliged for the lift," said he. "You can settle that matter of speed with the magistrate if you want to. As a stranger in these here parts I don't think my word would go for much."

White Heron in New Jersey.

Local naturalists and bird lovers are interested in a number of white herons which are making their headquarters at Avis' Pond, Woodstown, N.J., about a mile from town. The birds were first noticed about a week ago. These are the birds from which alightettes are obtained. Extinction of the species is feared because the alightettes can be obtained only when the bird is raising its young, and its death at the hands of the hunter also means starvation of the young heron.

Apparently Captor Need Not Have Been Afraid That His Prisoner Would Escape.

Billy Oswald of the Cleveland outdoor relief department was sent up to Detroit the other day to bring back a prisoner who had escaped from the workhouse. Full of the sense of his responsibility, Billy had handcuffs slapped on the man and stuck valiantly by his side, leaving no possible chance of escape. When an hour out from Detroit, homeward bound on the D. & C. boat, the prisoner suggested that Oswald relax his vigilance.

"Whatchu keepin' these things on me for?" he asked. "You don't think I'm goin' to jump over in the middle of Lake Erie, do you? Can't get away now."

Billy saw reason in the argument, released his man from the irons and gave him leave to stroll about deck. When the boat neared port, however, early next morning, the prisoner wasn't to be found. Oswald looked the boat over from engine room to bridge, but in vain. When the boat slid alongside the dock Billy was the first man off, stationing himself where he could see every person coming ashore.

In a couple of minutes he spied his man. But he wasn't trying to slip off unobserved. He came along boldly, lugging Oswald's baggage in one hand and his own in the other.

"Aw, there you are!" he sang out. "I've been lookin' all over the boat for you the last half hour."

BEWARE THE CARELESS MAN

Wise and Up-to-Date Grandmother Hands Out Some Good Advice to Engaged Girl.

The pretty girl was talking about her fiance. "He never seems to notice how I dress," she said, rather well pleased. "He tries to look interested, but I know from his expression that he does not recognize one gown from another, and once he told me I always look all right to him, no matter how I am dressed."

"Then don't marry him," advised a youthful grandmother of 60 almost tarty and wholly disregarding grammar. She was herself of the trim, smartly gowned variety of women who refuse to grow old. "Take my advice. If a man does not care how you look he never will provide the money for you to dress as well as you will wish to. A man ought to care how his wife is dressed. Not that it is the most important thing in life but that it has to do with the whole tone of their home. There is something wrong with a man who does not wish his wife to look her best. If your fiance is tractable I advise you to begin a course of instructing him at once. If not—" she shook her head warningly, smoothed down her slim hips, gave her satin walking suit a little flip and left for her constitutional in the park.

To Try Trapping Sparrows.

Agents of the department of agriculture, it was announced, have been for the last two months experimenting with devices to trap English sparrows.

From Maine to California an agent of the department has traveled during those months. Many machines have been tried out, but as yet one has not been perfected which officials say will do the work successfully.

Dr. Charles J. Fisher, who has the work in hand, said that the English sparrows are a nuisance and that they harm bearable fruit trees in the spring.

"Take young apple and peach trees, for instance," Dr. Fisher said. "The sparrows eat into the buds and destroy the cores. It then becomes impossible for them to bear fruit."

"We are doing no experimenting in Washington at this time. In several parts of the country, however, we have agents at work with devices. From what I have heard these machines have not as yet been perfected."

Artist's Habits.

Leonardo da Vinci was erratic in his methods of work. Some interesting reminiscences are preserved in one of the novels of Bandello. "He used often to go early in the morning and mount upon the platform, and from sunrise until the dusk of evening, never putting down his brush, and forgetting to eat and drink, paint without ceasing. Then two, three or four days would pass when he would not touch it, but remained for one or two hours together contemplating, considering and examining within himself, judging his figures. I have seen him, too, according as his caprice or humor moved him, go off at noonday, when the sun was in Leo, from the Corte Vecchia, where he was composing his stupendous horse of clay, and come straight to the Grazie, and, mounting the platform, take a brush and give one or two strokes to one of the figures, and straightway depart and go elsewhere."

Much obliged for the lift," said he. "You can settle that matter of speed with the magistrate if you want to. As a stranger in these here parts I don't think my word would go for much."

Remembered the Great Napoleon. The last French woman who met Napoleon I. face to face died recently at Troyes, aged one hundred and two. She was Mme. Millos, a widow, whose parents were on the domestic staff of the Palace of Fontainebleau. She was five when Napoleon, shortly before taking leave of his guards, spoke to her in the palace park. Mme. Millos retained a vivid recollection of this meeting until the day of her death, and on that account she was something of a local celebrity.

Cream of News Compiled and Collected From all Sources.

Governor Wilson has spent three hundred days out of the state during his term of office, all the time drawing his full salary, the Lieutenant Governor also being paid for doing his work. This does not include one hundred days more the Governor has spent in Louisville attending to his law practice, and ministering to his pleasure. Why take any more chances along that line? Judge O'Rear's platform approves every act of Wilson's administration, and it logically follows that he endorses the Governor's joy-riding all over the country at the expense of the State.

Clarksville Spurred To Action
By Christian County's
Good Work.

Clarksville and Montgomery, Tennessee, have been stirred to action by the fact that Hopkinsville is building good roads and is soon to be connected with Lafayette and the high country beyond by a good turnpike road, now all completed except 3 miles. A meeting was held Monday and a subscription started.

The business men of the city are looking after the city contributions and bankers, merchants and tobacconists are subscribing liberally, already having promised nearly \$1,000. It has been decided to secure the services of a government engineer and telegram was received by Judge Tyler, saying one could be obtained right away to which reply was sent to send him at once. He will be taken over all of the main highways and the first work under his supervision will be on the Hopkinsville pike and Lafayette road. The county has agreed to furnish all crushed stone, which will be hauled free of cost to the county. This is the plan that will be carried out on other roads on several of which the work of hauling will begin this week.

NEGROES BREAK JAIL.

Overpower Jailer and Take Keys From Him.

Elkton, Ky., Oct. 30.—Gitt Watkins and Robert Crump, negroes, escaped from the Todd county jail late this afternoon. They occupied the same cell, and when Jailer Troutt, with two other prisoners, went to the cell to place a mattress in it, Watkins and Crump overpowered the Jailer, and, taking the keys from him, escaped through the rear door. They took all of the cell keys and the keys to the rear door with them. Both men were charged with larceny.

The Tobacco Trust.

The proposed plan for the reorganization of the Tobacco Trust was praised and attacked before the United States Circuit Court judges for the Southern District of New York. Attorney General Wickesham filed the Government's answer to the scheme calling for certain restrictions, and counsel for the defense pleaded with the court for acceptance of the plan, claiming it was an honest attempt to comply with the Supreme Court mandate. Counsel for the independents charged that the scheme was a sham proposal which would still leave the trust in control.

SURE GAUGE OF MAN'S AGE

Is Seen in Degree of Interest He Takes in Announcement of Opening of School.

A man may gauge how old he is by the degree of interest he feels in the announcement that school's open again. If he is still a young man, with considerable of the boy left in him, he will hear that boy exclaim in some recess of his outdoor-loving consciousness: "Gee, that's too bad." Minds in which there is not the least symptom of momentary regret that the long and delicious vacation is over are minds which have long been engrossed by the cares of the workaday world and in which not even a living memory of the romance of boyhood days remains. As for the children themselves, they have our sympathy. Also the teachers. For teaching an unwilling child is no child's play, and it takes some time to get the wheels of discipline running smoothly. And yet there is a great deal in school life nowadays that is almost delightful. It is at least interesting to wide-awake boys and girls, and the progress that they make in their studies after the seductive call of outdoors has been forgotten is the best evidence that they appreciate the charm which comfortable schoolrooms combined with intelligent and kindly pedagogical methods have contrived to instill into our modern public school education.

HER REPUTATION

Mrs. Clawem—So you're going to leave, eh! I suppose you will be asking me for a reference.

The Cook—No'm. If I tell anybody I worked for you for two months that'll be all the reference I'll need.

DOLLY UP-TO-DATE.

Little girls of the present day are said to have no love for dolls. It is, unfortunately true, that whereas once upon a time every small maiden was to be seen hugging a dolly or wheeling several in a perambulator, that sight is now rare.

In toy shops they tell you dolls are not popular.

However, one finds there is a certain kind of doll which wins its way to the heart of the woman in miniature. It is not the baby, but the model manikin who has her trousseau complete like mamma. She has her corsets, her gloves, her large hats, parasols, bags and furs, perfectly à la mode. Her coiffure can be changed; in short she is a lady turned out en regle.

Thus even fashions in dolls are changing with the times.

JUGS FOR FLOWERS.

The girl who likes a few growing things around her, no matter how simple they are, should not bother about procuring handsome vases. She should take up the new fancy for using old English beer jugs. They are made in America as well as in England, and have all sorts of pictures on them, from Westminster Abbey, in London, to the Independence hall, in Philadelphia.

The jugs are low and broad and have wonderful coloring. They come in purple, in green and in brown, and sell for reasonable prices.

VICTIMS OF FASHION.

Lady in Hobble—Why, hello, Mary. How are you?

Lady in Hat—Oh, I'm out of sight. How are you?

Hobble—Well, I can't kick. Scribner's.

WHAT SHE DROVE.

"And what do you drive?" asked the woman who came to the party in an electric runabout.

"Nothing but my husband," answered the other lady.—Detroit Free Press.

Not An Experiment.

Paint Lick, Ky.—Mrs. Mary Freeman, of this place, says: "Before I commenced to take Cardui, I suffered so much from womanly trouble! I was so weak that I was down on my back nearly all the time. Cardui has done me more good than any medicine I ever took in my life. I can't possibly praise it too highly." You need not be afraid to take Cardui. It is no new experiment. For fifty years, it has been found to relieve headache, backache, and similar womanly troubles. Composed of gentle acting, herb ingredients, Cardui builds up the strength, preventing much unnecessary pain. Try it for your troubles, today.

FOR THE CHILD'S SLIPPERS

Dainty Bag for Her Dancing Pumps That Every Little Girl Will Appreciate.

If you are a lover of children you will not fail to make glad the heart of your favorite little girl friend by giving her a dainty bag to carry her slippers in when she goes to dancing school. This you can make from three-fourths of a yard of a dark colored silk and the same amount of a bright flowered satin or brocade for a lining.

Cut the pieces the same size, fold over once, sew together and run a double casing around the top two inches from the edge.

Ribbon is run through these casings, so the bag can be drawn up tight.

Sewed flat to the lining is a little patch pocket that has a flap which buttons over its opening. In it is a tiny hand mirror, so the little lady can arrange her curls before entering the room where the class is held.

Another pocket contains a small pin book fitted out with various sizes and kinds of pins, not forgetting several small and a few large safety pins. In this pocket is a folding shoe buttoner and in a similar packet is a little purse where the child can safely carry her handkerchief and the change for her fare.

The slippers and fan are carried in the main portion of the bag.

Such a bag would be acceptable and pleasing to any little girl who knows the joys of attending dancing class.

SPOILING HIS FUN

Bronson—Going to the city to hear the election returns.

Woodson—You bet.

Bronson—What excuse will you make to your wife when you get home in the morning?

Woodson—I won't make any.

Bronson—Eh?

Woodson—She always insists on going with me.

HEARING OF ANTS.

Naturalists generally appear to have accepted the opinion that ants are not able to perceive any sounds that are audible to human ears, but there are those who controvert this opinion. One investigator conducted careful experiments with four species of American ants, from which he deduced the conclusion that these species, at least, were able to perceive sounds, but whether they did it by means of organs of hearing, or through the sense of touch being excited by atmospheric vibrations, he was unable to ascertain. This experimenter inclines to the opinion that ants do really hear, as some individuals showed a perception of the direction of the sound, such as that of a shrill whistle, and others, which were not disturbed and violently shaken in their glass prisons, seemed greatly to be perturbed by shrill sounds.—Harper's Weekly.

MISUNDERSTOOD.

They were discussing the Greenhagen case in a Brooklyn trolley car. He was a sturdy German and his companion was evidently his wife. "I hope the little girl don't die from the poisoned candy," said the woman. "Where did she get it?" asked the man. "This paper says it was gift candy." "She knew it was gift and took it—she can't get my sympathy," said the man; and his wife, better versed in English than he, had to explain that "gift," which is poison in German, has a different meaning in the vernacular.—New York Tribune.

IT'S HAVOC.

"Love certainly does play havoc with a man's anatomy."

"In what way?"

"It makes him lose his head, give away his hand and often breaks his heart."

HOW WAR HELPS A NATION

Sir Reginald Hart Says It Consolidates a People While Long Peace is Disintegrating.

Peace for a nation is like a sleep for an individual, it gives time for rest and recuperation. But we must not sleep too long or we infallibly deteriorate. Peace is a disintegrating force, whereas war consolidates a people. War is no doubt a dreadful ordeal, but it clears the air, and refines the race as fire purifies the gold and silver in the furnace. Nations, like individuals, ultimately benefit by their chastenings—this is one of the mysteries of nature.

So long as any people, white, black, brown or yellow, hold weapons in their hands we must not commit the folly of beating our swords into plowshares.

The sufferings of man and beast in war are horrible beyond description, and yet, is it not true that it is not in war, but in peace, and in great commercial prosperity that our worst vices are developed, fostered, and grow rank? With our material prosperity we become self-indulgent, luxurious, inconsiderate, selfish and even unmanly. In war many of the noblest traits in human nature assert themselves and a high sense of honor comes before everything.—Sir Reginald Hart. B. C., in Nineteenth Century.

MYSTERIOUS RUINS IN PERIL

Remains of Great City Near Lake Titicaca of Which Even the Incas Knew Nothing.

On the plateau adjoining Lake Titicaca in Peru, the largest lake in South America, are found the ruins of a city as large as Boston. The stone walls of the principal buildings are of excellent workmanship and the gateways are elaborately carved. Some of the single stones weigh over 150 tons. There is some evidence that the inhabitants were the original discoverers of corn and potatoes. At all events, they were skilled masons and had attained an organized civilization. The origin of these ruins was as much a mystery 900 years ago, as is shown by the earliest records of the Incas, as it is now. At present the region in which they are situated is cold and arid and entirely incapable of ripening cereals. It is inhabited by a few hardy mountaineers. It is evident that the climate is entirely different from what it was when the plateau was the center of a large population. This change must be due to the elevation of the mountains on the east, and perhaps of the entire plateau.

LATE INFORMATION.

The little maid stood in the doorway, one hand on the handle. For a moment she gazed thoughtfully at her father, who was preparing to take his afternoon siesta.

"Papa," she said, "do you know what I'm going to give you for your birthday when it comes?"

"No, dear," answered her fond father. "But tell me."

"A nice new china shaving mug, with gold flowers on it all 'round," said the little maid.

"But, my dear," explained her parent, "papa has a nice one, just like that, already."

"No, he hasn't," his little daughter answered thoughtfully, "cos—cos—I've just dropped it!"—Exchange.

OSCAR LIKED THE TITLE.

Miss Kitty Cheatham had an encounter with Oscar Hammerstein which is worthy of relating.

Miss Cheatham was making a Fourth of July call on Ambassador Reid in London, and on the steps she met Oscar, who raised his tall hat and bowed low. He clung to Miss Cheatham's side as she entered the house, and she introduced him to the military and naval attaches as the "world's greatest impresario."

"Stay by me," begged Oscar. "You can make them all believe that."

AMÉLIE RIVES

Now the Princess Troubetskoy

has written a new novel for Lippincott's Magazine which bids fair to overtop the reputation of her first great work, "The Quick or the Dead." As in her first story, the scene is laid in Virginia, her beloved Southland. The plot is one of the most remarkable and absorbing that has ever appeared between covers. Don't wait to get the October number of Lippincott's in which Amélie Rives' great story appears. The number containing "The Quick or the Dead" was sold out in a flash. There will be an even bigger demand for her new story.

HINTS FOR THE HOUSEHOLD

How to Wash White Pique Waistcoats and Make Pretty Neckties at Home.

Washing a White Pique Waistcoat

Remove the buttons with a sharp hatchet, and wash the waistcoat with any soap that is advertised. If there are spots on the garment which do not belong there, use a small scrub brush and white sand. If this does not take them out, dip the waistcoat into hot naphtha. The principal time to be careful is in the drying of the thing. Waistcoats should never be hung on a line or clothes horse, but, to preserve their shape, must be dried on the person. Put on the waistcoat while it is wet and stand in front of the fire. Revolve very slowly until it is partly dry, and then go into a dark closet and shut the door. White goods must be dried in the dark. Keep on revolving. As the material shrinks, inflate your lungs to the fullest extent, or, if you are sufficiently puffed up with pride, this will not be necessary.

HOMEMADE NECKTIES—Very pretty white neckties may be made from ordinary lamp wicks. Choose the flat kind, buying a sufficient number to make the necktie long enough. Join the ends neatly with a drawn-work stitch, and tie in a four-in-hand or butterfly bow, according to taste. A delightful bob chain may also be made from a single lamp wick. The natural color of the wick may be used with duck or white serge suits, but for evening wear the wick should be dyed black.—Judge's Library.

HONORS TO THEIR COUNTRY

Old Maids Gain Due Recognition in New Orleans Movement for Their Aid.

"Honor the old maids, for they are worth more in push, ability and character than the mollycoddles they are replacing right and left every day." Such was the announcement made a few days ago by an organizer of the movement to aid spinsters. Since that time more than 500 letters of appreciation have reached him. One of the latest letters, from Chicago, reads: "I read the surprising announcement that a man is championing the cause of the 'old maid.' I am glad to see that a business man is taking this stand and telling whoever can and will read that the woman who is forced to earn her living, or is doing it through choice, has the push, ability and character necessary to insure her an independent and happy life, without waiting for some impossibility to marry her." The man who wrote that letter is a gentleman in two places, and we doff our hat to him in reverence and respect. And, returning to the subject of women who work for a living, why they're queens of love, light and liberty and an honor to their country.—New Orleans Picayune.

ABDUL HAMID'S JEWELS.

One of the most remarkable auctions ever held in Paris is to take place toward the end of November, namely, the sale of the jewels formerly belonging to the former sultan, Abdul Hamid.

It will be remembered that when Abdul was deposed the Ottoman government seized this property as belonging to the nation. Since then they have been stored with the Imperial Ottoman bank, but now the government intends to apply the proceeds of its sale to the purpose of increasing the Turkish fleet.

The collection is very large and varied, and contains a large number of magnificent pieces, although somewhat barbaric to modern tastes.

SURGICAL SEWING MACHINE.

A New York surgeon has invented a surgical sewing machine, one of the kind that will patch up your lacerations just as a dressmaker or tailor sews bolts of cloth together. And while he was claiming this to be the greatest invention of the age, another wizard shouted that he had conquered one-seventh of the law of gravitation, having struck upon a means that would prevent crippled air craft from tumbling to earth. As soon as he covers the other six-sevenths of the situation there is no telling what he shall be able to do.

MANY DO.

"Now, there's Pippy. He never bets on a horse race."

"May be not, but he does worse."

"In what respect?"

"He bets on the outcome of murder trials."

DESERVED TO WIN

High School Puts Up Plucky Game Against Winthrop Team.

Friday afternoon High School put up one of the pluckiest football games ever seen here against the heavy and more experienced Winthrop team. High School was outweighed by over twenty five pounds to the man yet there was no flinching on the part of the High School boys. Winthrop got away on the start and made a touchdown in the first quarter, but after this they had to fight for every inch of ground. They annexed another touchdown in the third quarter but in the fourth quarter High School kept the ball in the visitors' territory all the time,

and it seemed as if nothing could keep them from scoring. At one time they had the ball on the Winthrop 5 yd. line but weren't able to put it over.

While every member of the High School team played great ball yet several deserve especial mention. Walker at guard played an excellent game considering the fact that his opponent weighed exactly seventy pounds more than he did. McReynolds, sub tackle, also played a good game. But Weeks, right end for the High School team, played the best game played by any member of either team, looking like a midget yet time after time he broke through and stopped plays.

For Winthrop, Floyd, Tillet and Powell played good ball. The interference and team work of the whole team was good.

Winthrop Wins Again.

The Winthrop football team defeated McLean College Monday by 10 to 5.
